

Contributions and Other Spending

Seeking a strategic dialogue and the development of the sector, LATAM is a member of representative agencies holds permanent dialogues with different organizations.

The financial contributions to these associations can be seen in the table below.

Contributions to trade associations (USD)				
2016	2017	2018	2019	2020
1,500,000.00	1,500,000.00	1,600,000.00	1,600,000.00	2,013,238.00

Additionally, some of the main topics that we monitored during 2020 can be seen in the following table.

Issue or Topic	Corporate Position	Description of the engagement	Total spend in FY 2020
Efficiencies for a closer aviation = LATAM has been active in promoting a series of initiatives to bring air transport closer to more people. To do this, LATAM promotes in all the region airport infrastructure solutions that allow passengers to access to aviation with lower costs. Airports with good connectivity to the main cities, with easy and quick process, and adequate operational costs, are the ideal model airport. Is necessary to work together with the authorities to warranty an infrastructure capacity adequate to the raising demand in South America, and a healthy competition with new operators. Aware of the importance of aviation for communities and tourism, LATAM works closely with tourism associations and authorities to promote the growth of tourism in the region.	Support	LATAM promotes a series of initiatives to bring air transport closer to people. To do this, LATAM incentivizes airport infrastructure solutions that allow passengers to access to aviation with lower prices throughout the region. LATAM endorses and agrees with improvements to Airports that help connectivity of people to airports, cities, homes, transit, and central business district among others. It is necessary to work together with the authorities to warranty an infrastructure capacity adequate to the raising demand in South America, and a healthy competition with new operators. Aware of the importance of aviation for communities and tourism, LATAM works closely with tourism associations and authorities to promote the growth of tourism in the region.	1,811,914.00

<p>Environmental Regulation & Climate Change = For the air industry, carbon emissions and other pollutant gases are being highly regulated. These initiatives are generally unilateral, generating in certain cases double taxations and several other costs associated with regulatory issues for international and domestic flights.</p>	<p>Support with minor objections</p>	<p>We are highly aware that the air industry impacts on global carbon emissions. We work closely with organization that represents the industry in order to advocate for programs that reduce carbon emissions and engage better practices for the industry.</p>	<p>201,323.00</p>
